Re: New Course Proposals
Date: January 18, 2017

At the January 9, 2017 board meeting the curricular changes and new course proposals from Glenbrook North and Glenbrook South were brought forward.

The proposals have been thoroughly discussed in each building by relevant departmental committees, by Instructional Supervisors, curriculum councils, and by building principals. The Board will note that they seek to meet the academic needs and interests of students in keeping with a comprehensive high school program. Both schools offer a rigorous array of courses which support students' college and career readiness.

I recommend that the Board take action on this item at the Tuesday, January 24, 2017 Board meeting.
