Re: Resolution Authorizing Additional Life Safety Work

Resolution Requirement

The Illinois State Board of Education requires the Board of Education to pass a resolution formally approving the tennis court replacement at Glenbrook North High School, subsequent to conducting a public hearing on said topic.

Project Requiring a Public Hearing and Resolution

As discussed at the October 23, 2017 board meeting, according to the Illinois School Code, in order to use Life Safety funds for exterior projects the Board of Education must conduct a public hearing and pass a resolution. Attached to this memo is the resolution to be voted on by the Board. It was modeled after the resolution adopted in August 2016 for the outdoor track project at GBS and contains the mandatory language required by state code.

Project	Location	Description	Amount
Tennis Court Replacement	GBN	The GBN tennis courts were built in 1957 and have been resurfaced several times over the years. Additionally, the courts were overlaid with an asphalt slip sheet twice. There is significant cracking which allows water to enter and get trapped between the multiple layers of asphalt. The water freezes in the winter which causes the pavement surface to further crack and heave. The cracks have gotten significantly worse over the last winter and need to be replaced. The scope of work includes removing all existing asphalt and fencing, installing new asphalt surface, applying a new tennis surface coating, a new vinyl coated fence, new tennis posts and netting. Soil borings were taken and the subbase under the tennis court is adequate to support the new surface - no undercuts are necessary.	\$520,000
