SUBJECT: DASHBOARD REPORT – STUDENT ACHIEVEMENT
DATE: NOVEMBER 4, 2010
CC: BOARD OF EDUCATION

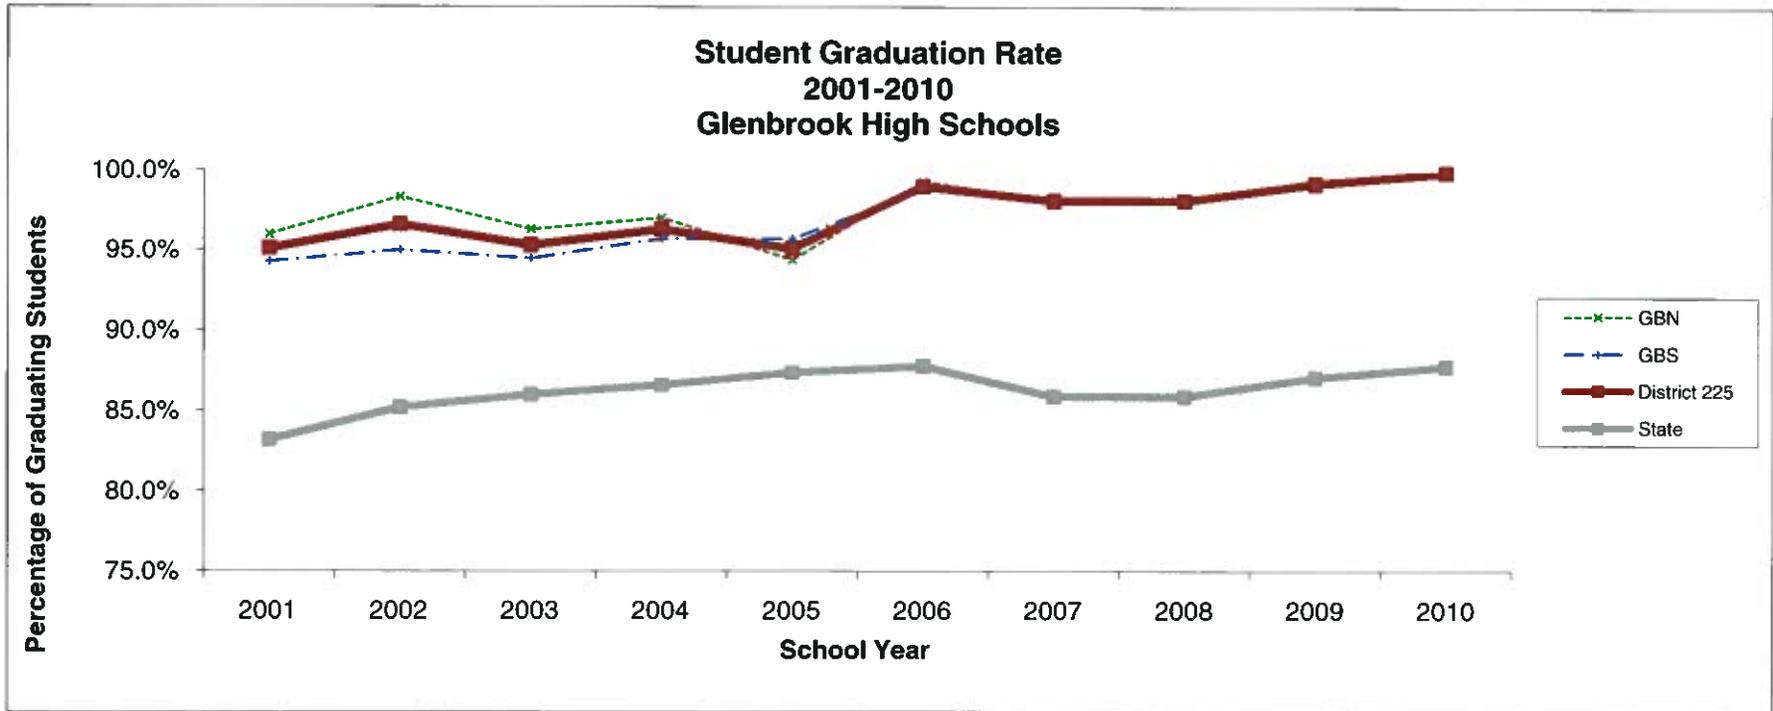

At the November 8 Board meeting, we will be bringing to the Board pertinent data related to student achievement, especially as evidenced by the Prairie State Achievement Exam (PSAE) and Advanced Placement exams administered last spring.

The format of the student achievement dashboard reports has changed from that of the past few years. Rather than comparing current data with a five-year single data point look-back, we are in the process of incorporating 10 years of data so that trends in student achievement can be identified. We are still in the process of gathering some of the ten-year historical data. As such, some of the graphs are incomplete; however, we wanted to provide the Board with the template that we are moving towards. As data is updated, we will be posting the student achievement dashboard report on the district website.

The following points are worth noting when reviewing the data:

- Graduation rates have continued to rise for both high schools with the 2010 district average at 99.9%, the highest on record.
- The percentage of students attending college at both schools has consistently been over 95% since 2003.
- Average all-subject credits taken have increase over time at both schools.
- Composite ACT scores at both schools recently reached all-time highs in 2009 at GBN and in 2010 at GBS.
- Efforts have been in place at both schools to address the needs of special education students and low income & Hispanic students at GBS. These groups of students have performed at a level below that of their white and Asian counterparts. Because of the relatively small size of these subgroups of students in the junior class who participate in State assessments, there has been greater fluctuation their academic performance.
- AP participation has steadily increased over time at both schools while the percentage of students potentially qualifying for college credit remains around 90%.

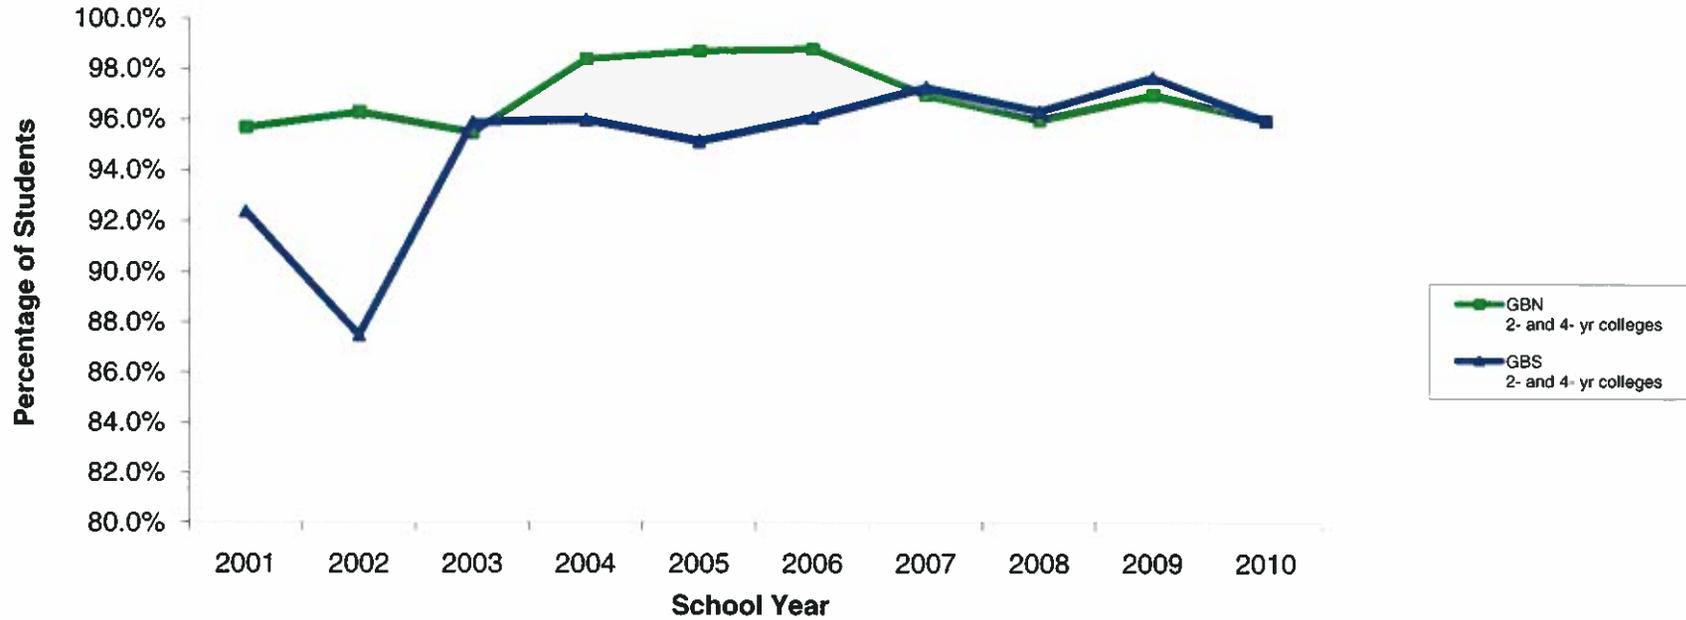

At the December 13 Board meeting, we will provide the Board with pertinent student and teacher demographic data.

*Graduation Rate is the number of high school graduates divided by the first-time ninth grade fall enrollment, less students transferred out, plus students transferred in, multiplied by 100. District data does not include GBE.

* Academic Grade Point Average (GPA) includes only those courses in the areas of English, Foreign Language, Mathematics, Science, Social Studies and Honors level courses in elective areas. Grades are weighted according to course level. The range for Academic GPA = 0.0-5.0.

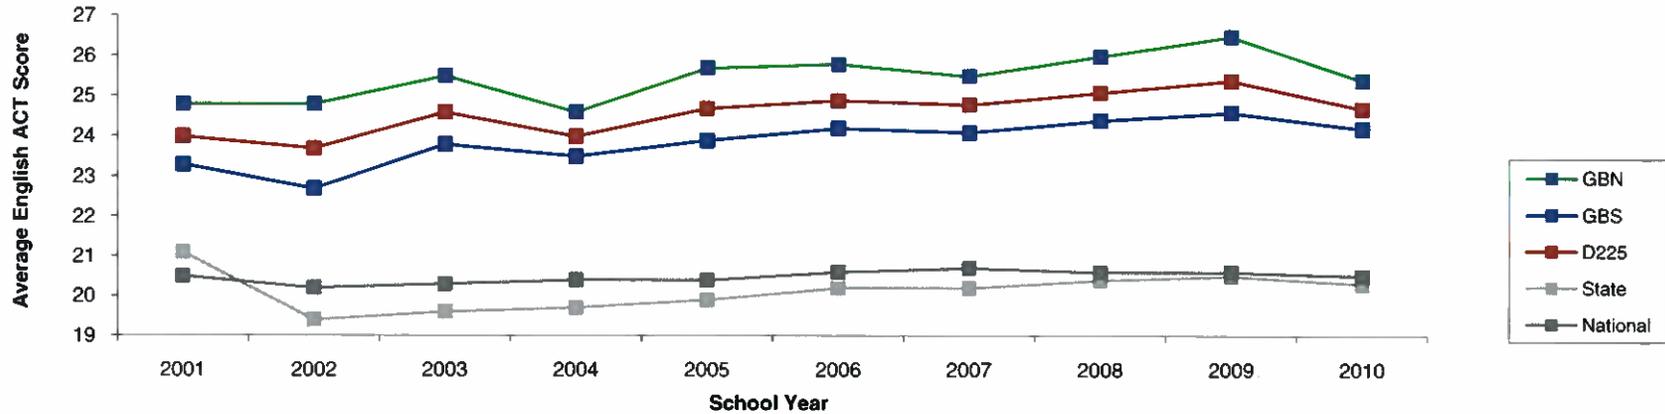

* Composite ACT Score consists of English, Math, Reading and Science Reasoning ACT Scores. Composite ACT scores range 1-36. These scores include all graduating seniors who took the ACT during their sophomore, junior or senior year. If a student tested more than once, only their most recent test scores, not necessarily their highest scores, are used. Note: Starting in 2001 the ACT scores include those taken as part of the Prairie State Achievement Exam. As a result, ACT composite scores beginning in 2002 reflect the entire student population instead of those who voluntarily took the exam.

Analysis:

CORE is defined by ACT as a curriculum consisting of 4 English, 3 Math, 3 Science, and 2 Social Science courses. This section compares students who have fulfilled the ACT CORE curriculum to those who have not. Those who have fulfilled the CORE typically score higher than those who have not. Be aware that students self report if they are in the CORE or not in the CORE.
