RE: PRELIMINARY REVIEW FOR TEXTBOOK CHANGES FOR THE
2011-2012 SCHOOL YEAR

DATE: April 11, 2011

Attached you will find the list of textbook changes we are recommending for next year for Glenbrook North, Glenbrook South, and Glenbrook Academy of International Studies.

The requests have been reviewed by the teachers involved, the instructional supervisors and the associate principals. All attached requests are recommended for approval. Copies of the proposed textbooks will be available at the Board meeting for review on Monday, April 11, 2011. Kris Frandson, associate principal at Glenbrook North and Cameron Muir, associate principal at Glenbrook South will be at the meeting to assist in addressing Board questions as will instructional supervisors and the Director of the Glenbrook Academy. Note that Academy textbook proposals are contained within the GBS report (pp. 24-27) as the GBS bookstore orders Academy textbooks.

While this compilation reflects the majority of textbook changes, we may bring to the Board a limited number of texts in mid-summer, which reflect instructional decisions made during summer curriculum projects.

I recommend that the attached list be presented to the Board of Education for the Board's preliminary review at its meeting of April 11, 2011. **It is my intention to resubmit the changes for Board approval at the regular Board meeting of April 25, 2011 on the consent agenda.**

Re: Textbook Adoptions for 2011-2012

Attached you will find one document that summarizes the request for textbook adoptions for the 2011-2012 school year: *Textbook Change Summary 2011-2012*.

The GBN curriculum has continued to evolve through the Educational Planning Process, participation in articulation with sender schools, the availability of instructional technology components that accompany many new textbooks, student enrollment and changes in curricular programs. In light of these initiatives, come requests for changes in a few textbooks in world languages (2), social studies (1) and career and life skills (1). Continued development of our offerings in Hebrew necessitated the adoption of an additional text for the new third year course. The remaining textbooks proposed for adoption are due to publisher changes and availability of textbooks in world languages (1) and mathematics (1).

Attached you will find one document that summarizes the request for textbook adoptions: *Textbook Change Summary 2011-2012*.

The curriculum at GBS continues to evolve through the Educational Planning Process, the AP Audit, articulation with sender districts, research in best practices, and the ever changing needs of our at-risk students. Along with these curricular changes, come requests for changes in a number of courses in English (6), Foreign Language (14), Health (1), Mathematics (3), Science (4) and Social Studies (6). The remainder of textbooks proposed for adoption is due to publisher changes, new courses, outdated information, and availability of textbooks in English(2) Foreign Language (3), Mathematics (1).

A	Pacemaker Health	Louis J. Cantaflo, Richard Lowell, Susan Petro	Globe Fearn	3rd	N	Pacemaker Health has been used in the LA Health Class for 5 years. We were fortunate to have been given a monetary grant for a pilot program using the books 5 years ago. Through the program we were able to purchase 15 books. Over the years, the health education department has purchased several more books due to increased enrollment. We are at the point where the original books have been used at least 10 times (twice each year by different students) and are in terrible condition. A	physicsclassroom.com	Henderson	N/A	N/A	N	Over the past decade, GBS physics teacher Tom Henderson has created an interactive online physics textbook called "The Physics Classroom" (www.physicsclassroom.com). This online textbook and many of its ancillary materials have been used by high schools from literally around the world. It is one of the most used online physics learning resources today. While this has been a resource for our students over the past decade, it has not been the primary text for our physics classes. As we continue to explore the possibilities of online learning tools, we see the number of physics students able to access the internet from home approaching 99%. As a school and as a department we work to build such resources into online learning environments such as Moodle and WebAssign and we believe we are at the point where a transition from a physical textbook to an online textbook in this class is appropriate. "The Physics Classroom" offers the same high quality content that a traditional textbook offers, but with interactive features that allow the teacher to link to the text from within WebAssign assignments for students who are struggling with a given problem, the ability to post reading assignments that can be embedded directly within Moodle or other webpages, and opportunities for students to move from one concept to related concepts through hyperlinks all for no additional cost to students.		\$0.00
