Note: FY06 reduction was due to pre-referendum budget plan. FY08 reduction was due to the outsourcing of postage and purchase of Drivers Ed automobiles. FY11 reduction is part of the current budget reduction plan. The methodology used to calculate the building operating budget allocation was established by the Board of Education in FY1996. Two main factors are used to establish the allocation: 1) projected enrollment and 2) an annual cost of living adjustment. The final allocation for each school is computed as follows: one-third of the total allocation is allotted equally to each school for fixed costs (ie building maintenance and supplies) and two-thirds of the total allocated is allotted to each school based on enrollment.

Note: The tuition charge per pupil is calculated as part of the Annual Financial Report which is completed after the the close of the fiscal year. The tuition charge is calculated by taking applicable expenditures less revenues or expenditures of nonregular programs, less offsetting revenues, plus depreciable allowance. This total cost is then divided by the Average Daily Attendance to calculate the tuition charge per pupil. The increase in FYO8 is due to an increase in applicable expenditures, a reduction in offsetting revenues due to the outsourcing of food service and bookstore operations, and a decrease in ADA. The increase in FY09 is due to an increase in applicable expenditures, an increase in depreciable allowances, and a decrease in ADA.
