Re: October 1 Fall Housing Report

Date: October 8, 2014

In keeping with Illinois State Code, enrollment counts were finalized on October 1 for District 225 schools. These enrollments become the base for state statistics and are also used by the district to calculate enrollment forecasts and determining future staffing levels. The tables below contain enrollment counts by grade for GBN, GBS and the District, along with enrollment projections for the 2014-2015 school year as determined by District 225 and Dr. Jerome McKibben. These projections were shared publicly last March.
